

Megan Johnson is a Project Manager at Proactive Technology Management, where she supports organizations in implementing technology solutions that improve operations, data visibility, and decision-making. Her work includes supporting AI-enabled tools, system integrations, and process improvements that help teams work smarter and more efficiently.

Prior to transitioning into technology project management, Megan spent more than a decade leading enterprise programs and strategic initiatives within the financial services industry. Her work focused on corporate responsibility, workplace culture, and community engagement, where she collaborated across business lines to develop programs that supported employee growth and organizational impact.

A graduate of Oakland University with a BA in Gender Studies and a certified Diversity Professional, Megan combines strategic thinking with practical execution to help organizations navigate complex initiatives and build stronger, more collaborative teams.

As a Unity Collaborative Advisory Board member, Megan remains passionate about supporting initiatives that strengthen community, leadership, and opportunity.
